

## H8 Bubble Machine

The H-8 DMX Pro Bubble Machine is a revolutionary professional and durable machine that is capable of introducing enormous quantities of bubbles into the atmosphere. It is also equipped with 2 fans at bottom that offer a variable speed and angle control which allows for greater flexibility in the bubble projection. The excess bubble fluid will flow back to waste fluid tank through pipe instead of dropping on the ground.

### Power supply system and output

Voltage	240V 50Hz	Tank Capacity	3.5 L.
Power	200W	Fluid Consumption	64min./Ltr
Chilling time	5 min.	Liquid type	Bubble liquid
Output	4m. High 8m. Distance	DMX Personality	1 channel

### Appearance parameters

Structure	Steel	Size	390 x 270 x 375mm
IP Rate	IP20	Net weight	21.75 Kg

Channel	DMX Value	Function
1	0 - 9	Off
	9 - 255	Output Low > High

1. Safety bolt
2. Nozzle
3. Fluid tank plate
4. Fan adjustable output
5. Antenna
6. Power out
7. Power in
8. Handle
9. LCD control panel
10. 3-pin DMX
11. 5-pin DMX
12. Waste fluid container plate
