

## H8500 Low Fog

The H8500 low fog machine is a unique machine that uses a built-in chiller that allows it to be used without dry-ice or CO2. Just turn it on wait 4-5 min. and you're ready for that amazing cloud-like low fog effect.

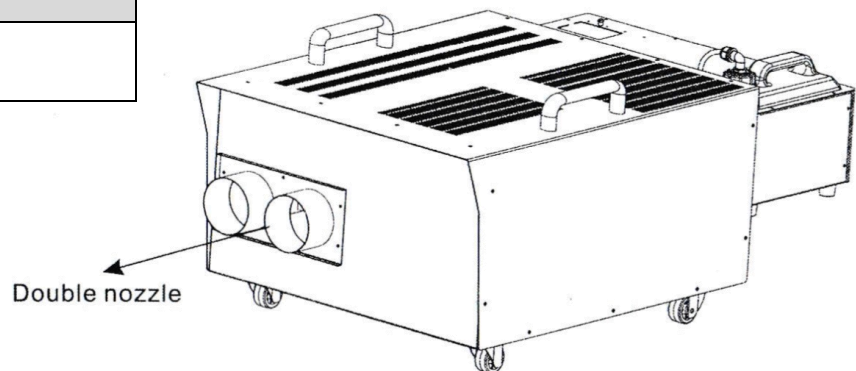

### Power supply system and output

Voltage	240V 50Hz	Tank Capacity	5 L.
Power	3,200W	Fluid Consumption	9.1min./Ltr
Chilling time	4 min.	Liquid type	Water Base
Output	15,000 cu.ft/min.	DMX Personality	1 channel
Longest Duration	90 sec.	Max. coverage	250 Square metres

### Appearance parameters

Structure	Steel	Size	815 x 472 x 875mm
IP Rate	IP20	Net weight	95 Kg (inc liquid)

Channel	DMX Value	Function
1	0 - 5	Off
	6 - 255	Fog output Low > High

1. Handle
2. Chiller LED indicator
3. Fluid tube
4. 5L container
5. Chiller power switch
6. Chiller power socket
7. Chiller breaker
8. 3-pin DMX socket
9. 5-pin DMX socket
10. Fog machine switch
11. Fog machine power socket
12. Fog machine breaker
13. Water container
14. Wheels
15. Nozzle
