LED Screen Dolly System

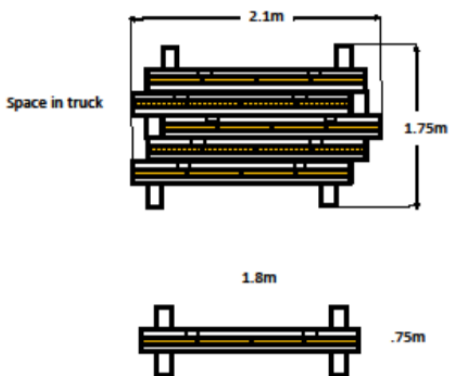

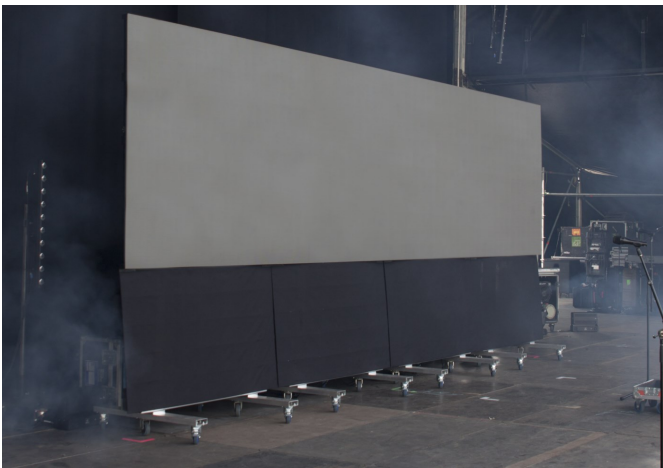

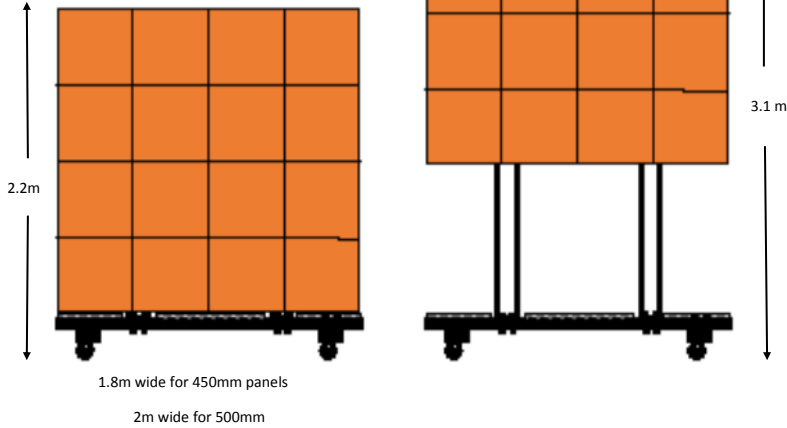

Lighting Labs custom built LED screen dolly system is ideal for used for moving screens around to make up different shaped screens during a show. Or as a self standing screen using 12 panels (2m x 1.5m using 500x 500mm panels). The possibilities are endless.

Let your imagination go wild!

Also stacking a number of dollies takes up minimal space due to the fact they can be interlocked. Very handy when storing and transporting

16 - 450 x 450 panels
Total 1.8m x 1.6m

16 - 500 x 500 panels
Total 2m x 2 m

4 dollies = 7.2m wide for 450mm panels and 8m wide for 500mm panels
